

MD. ASHIKUR RAHMAN BISHAL

Phone: +880 1601610160 **Email:** m.arbishal@gmail.com **Portfolio:** dev.arbishal.com
linkedin.com/in/arBishal · github.com/arBishal · medium.com/@arbishal · dev.to/arbishal

Frontend-leaning software engineer with **3+** years of experience, collectively serving **85M+** end users across **190+** financial institutions. Focused on growth and fostering collaborative learning environments.

EXPERIENCES

DYNAMIC SOLUTION INNOVATORS LTD.

April, 2023—Present

Software Development Unit

- Accelerated development workflows by integrating **AI-assisted tooling**, cutting repetitive overhead and shipping features faster across multiple projects.
- Mentored junior engineers through structured **technical coaching**, including hands-on code reviews, pair programming, and knowledge-sharing sessions, **improving overall team capability**.
- Audited **application dependencies** for security vulnerabilities, implementing **compatible upgrades** and **Content-Security-Policy enforcement** to strengthen application security.
- Proactively built **helper tools** adopted across the team to automate repetitive workflows—increasing efficiency and reducing delivery time.
- Designed a **keep-alive mechanism** that enforced a maximum of ≤ 2 req/min API rate limits, eliminating redundant traffic while preserving seamless session continuity.
- Diagnosed and resolved **logic errors and edge-case flaws** in deployed applications, averting potential escalations and client-side friction.
- **Led migration** of legacy monolithic architecture to a modern multi-tenant platform, delivering a fully tested and documented transition across multiple services with zero critical disruptions.
- Took **ownership of critical production issues**, minimizing downtime through swift resolution.
- Demonstrated strong **accountability and data ethics** in handling sensitive and high-volume banking data; strictly adhering to **data privacy standards** and regulatory compliance requirements.
- Collaborated with **cross-functional** and distributed teams across multiple projects to deliver reliable, scalable, and maintainable software solutions.
- Consistently produced **clean, well-structured code** and comprehensive documentation, upholding high engineering standards to support long-term maintainability and team knowledge sharing.

MINISTRY OF ICT DIVISION

January, 2022—October, 2022

Research Internship

- Formulated the **mathematical scoring model** for a financial reputation engine, deriving logarithmic scoring functions over money transfer, loan repayment, and bill payment behavior.
- Designed the **aggregation function** combining these scores with account age, bounded to a normalized range using a modified sigmoid transformation.
- Implemented the engine as **recursive time-indexed algorithms** with thorough documentation.

COMPETENCES

Programming	JavaScript, TypeScript, C++
Web Stack	React.js, Next.js, Vue.js, Meteor.js, HTML5, CSS3, TailwindCSS
Databases	Oracle, PostgreSQL
Tools	Git, SVN, Postman, JIRA, Datadog, Figma
AI Workflow	Claude Code, Antigravity, Codex

EDUCATION

B.Sc in Computer Science & Engineering
Shahjalal University of Science & Technology
CGPA: 3.67/4.00

2018—2023

NOTABLE PROJECTS

FRONTEND 101

2026—Present

 [Github Repository](#)  [Live Demo: frontend101.arbishal.com](#)

Creator & Sole Maintainer

- Designed and developed an **interactive learning platform** that teaches core frontend concepts through **live, manipulable demonstrations**.
- Shipped **client-side syntax highlighting** for demos that generate code from live state, offsetting the cost via a shared memoized highlighter singleton.

TypeScript

Next.js

TailwindCSS

Shiki

Claude Code

FIREFLIES SIMULATION

2025

 [Github Repository](#)  [Live Demo: fireflies.arbishal.com](#)

Passion Project

- Developed an **interactive firefly simulation**, preserving their magic through generative motion and flickering light.
- Implemented **touch/cursor reactive physics**—fireflies drift, pulse, and gently attract or scatter based on interaction; with real-time controls for population, radius, speed, etc.

JavaScript

CanvasAPI

Vue.js

TailwindCSS
